

Professional, End-to-End Installations Nationwide

From Unboxing to Operational: EMSAR Delivers Seamless Setups That Save You Time and Headaches

Whether you're deploying a single sterilizer or outfitting an entire surgical suite with booms and lights, EMSAR handles it all, precisely, professionally, and with a healthcare-first mindset.

What We Offer:

- **Turnkey Equipment Setup**
Unpackaging, placement, calibration, power-up; all up to OEM specs.
- **Heavy-Duty Installation Expertise**
Ceiling- and wall-mount installations of booms, OR lights, wall arms, and sterilizers, plus lifts, monitors, and more.
- **Construction-Ready Team**
Our FSEs bring their own tools and training, capable of handling build-out tasks like drilling, anchoring, and rigging.
- **White Glove Handling**
Trained to manage sensitive, high-value medical equipment in active clinical environments.
- **Compliance-First Approach**
Every install follows OSHA, infection control, and local code requirements. We understand ISO 13485 and what it takes to meet healthcare standards.

Why EMSAR?

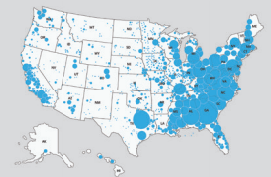

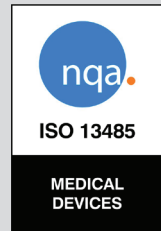

Specialized in Healthcare – Unlike general contractors, we know medical devices and regulatory environments.

Nationwide Reach – Scalable field service teams deployed wherever needed.

Manufacturer-Trusted – Top medical OEMs rely on EMSAR for complex installs.

Metrics-Driven – We measure success through on-time delivery, first-time-right rates, and customer satisfaction.
